

Proposed FAC Energy Independence Workgroup Mission Statement

The FAC Energy Independence Workgroup is a group of County Commissioners appointed by the President to advise the Growth, Environmental Planning, and Agriculture Policy Committee on energy policy. The group will also serve as a forum for information-sharing, so that counties can learn from the best energy practices of other counties. The group will explore renewable technologies and examine federal and state law to ensure that renewables are encouraged and incentivized, making policy recommendations where that is not the case.
