

DISASTER SURVIVOR ASSISTANCE

"FEMA will achieve a timely presence on the ground in the impact area following a disaster, maximize the effect of our first touch with survivors, and bring our programs and services directly to those who need them—in their communities, in their homes, in shelters, and wherever survivors need us to be present." W. Craig Fugate, FEMA Administrator

What is Disaster Survivor Assistance?

Based on the desire to provide expanded services to disaster survivors, FEMA leadership transferred the Community Relations program to the Recovery Directorate, effective April 8, 2013. In an effort to reflect our commitment to the disaster survivors and the expanded role of the cadre, FEMA changed the name from Community Relations to Disaster Survivor Assistance.

The DSA mission is to build and sustain an expeditionary cadre that can establish a timely presence primarily focused on addressing the needs of disproportionately impacted populations and disaster survivors by:

- Collecting targeted information to support leadership and operational decision-making;
- Providing accessible, in-person case-specific information and referrals;
- Providing referrals to whole community partners, as needed; and
- Identifying disability-inclusive public information needs so strategic messaging can be developed and disseminated.

5 Essential Functions of DSA

5 Essential Functions of DSA

- **Assess, Inform, Report (AIR):**
 - Assess, inform and report back to the Operations Section and other Joint Field Office (JFO) leadership for decision-making purposes.
- **On-site Registration Intake**
 - Register survivors for disaster assistance, provide guidance on the registration process and provide an overview of the assistance available through FEMA.
- **Case Status Updates and Inquiries**
 - Review on-site survivor information to provide survivors with basic information about the status of their application, other assistance for which they may be eligible for, and collect new information or documents to update their cases.
- **Survivor Needs Assessment**
 - Engage with survivors in affected communities to identify immediate and unmet needs for quick resolution that can be addressed with assistance and resources available through FEMA and/or whole community partners.
- **Referral to Whole Community Partners**
 - Inform survivors about the range of resources available in the community. Provide information and points of contact for assistance from other Federal agencies, State, Tribal, Local, Non-Governmental Organizations (including Disability Organizations), and the Private Sector.

DSA is a professional, mobile “force multiplier” that supports Federal, State, Local, Tribal and Territorial requirements in the field. DSA can quickly deploy in advance of, or immediately following, a Presidential Disaster Declaration.

Helping Survivors through Mobile Technology

DSA crews use tablets and other mobile reporting tools to enhance their capabilities. These tools allow DSA to bring services directly to the survivors who need the most help.

- Hand-held tablets let DSA register survivors at home, work, shelters, hotels or wherever they may be.
- The Survivor Mobile Application Reporting Tool (SMART) uses mobile geo-tagging and photo-capable devices in the field.
- Gives FEMA leaders an instant picture of critical and emerging needs and the overall pulse of the impacted communities.
- Automates information flow, reduces errors and need for paper maps.
