Missed Yesterday's Webinar? Watch it now!

Yesterday, the Institute for County Government and the University of Florida IFAS Extension hosted a panel of experts from UF Health to provide an update on testing, research and vaccines as well as discuss steps on moving forward. This webinar is a follow from the April 2 webinar on the science of COVID-19.

FAC surveys are getting statewide attention and recognition as people make decisions on COVID-19.

As the status of the coronavirus changes within the state, FAC would like to ensure that our COVID-19 County Response Dashboard accurately reflects those changes.

To help FAC's data stay relevant to current county decisions, please answer the poll question below.

Is your county negotiating hazard pay for any workers?

Yes

Secretary of the Treasury Releases Guidance for State, Local, and Tribal Governments on the Coronavirus Relief Fund

On Wednesday, April 22, Secretary of the Treasury, Steven Mnuchin, released guidance for State, Local, and Tribal Governments regarding the Coronavirus Relief Fund (Section 5001 of the CARES Act).

As stated by the legislation signed by President Trump on March 27, the use of funds “are necessary expenditures incurred due to the public health emergency with respect to the Coronavirus Disease 2019 (COVID–19).” The guidance document (here) and frequently asked questions (here) provide, in detail, examples of eligible and ineligible expenditures of the $150 billion Coronavirus Relief Fund.

Additional information about Assistance to State and local governments here.

More Resources from FAC’s Corporate Partners!

Counts of all sizes are facing budget impacts due to COVID-19 and its far-reaching impact on our local economies. FAC works every day to develop programs and partnerships to help counties fulfill their mission, including Cashvest by three+one. Learn more about Cashvest by three+one in the video.

For additional resources from FAC’s other program and corporate partners, please click here.

Images or Videos of the Response: Counties on the Frontline

Local Governments are the first line of defense and the first to take action in recovery. During this unprecedented global emergency, we would like to share your images or videos from your county’s and community’s response to the COVID-19 crisis. Whether it’s logistics and staging, community response or neighbor helping neighbor, please share your images or videos with us and your fellow counties.

Sarasota County Public Works staff has continued to complete projects while they social distance. Last week, crews replaced a sidewalk on Concord Street.

Q&A with the CDC

What should I do if an employee is suspected or confirmed to have COVID-19?

In most cases, you do not need to shut down your facility. But do close off any areas used for prolonged periods of time by the sick person:

- Wait 24 hours before cleaning and disinfecting to minimize potential for other employees being exposed to respiratory droplets. If waiting 24 hours is not feasible, wait as long as possible.
- During this waiting period, open outside doors and windows to increase air circulation in these areas.

Follow the CDC cleaning and disinfection recommendations:
Clean dirty surfaces with soap and water before disinfecting them.

- To disinfect surfaces, use products that meet EPA criteria for use against SARS-Cov-2, the virus that causes COVID-19, and are appropriate for the surface.
- Always wear gloves and gowns appropriate for the chemicals being used when you are cleaning and disinfecting.
- You may need to wear additional personal protective equipment (PPE) depending on the setting and disinfectant product you are using.

In addition to cleaning and disinfecting, employers should determine which employees may have been exposed to the virus and need to take additional precautions:

- Most workplaces should follow the Public Health Recommendations for Community-Related Exposure.
- Critical infrastructure workplaces should follow the guidance Implementing Safety Practices for Critical Infrastructure Workers Who May Have Had Exposure to a Person with Suspected or Confirmed COVID-19.

Sick employees should follow CDC-recommended steps. Employees should not return to work until they have met the criteria to discontinue home isolation and have consulted with a healthcare provider and state or local health department.

If an employee is confirmed to have COVID-19, employers should inform fellow employees of their possible exposure to COVID-19 in the workplace but maintain confidentiality as required by the Americans with Disabilities Act (ADA).

### Department of Health Resources

The Florida Department of Health’s COVID-19 Case Dashboard is updated twice daily with the total number of cases in Florida.

Today, as of 11 a.m., there are 30,174 total** Florida cases. More information on a case-by-case basis can also be found here.
