A LOOK AT COUNTY PROPERTY TAXES IN FLORIDA

This report provides statewide context for county property tax data, using locally sourced, audited, and state reported data. Information in this report and the county snapshots is intended to inform state officials and the public on factors impacting Florida's property tax system and county budgets.

Each county in Florida has a unique property tax base depending on the county's composition of real property. Counties, with disproportionately high amounts of non taxable property, including federal and state owned lands (state government, universities, national forests) and low homestead property values have a property tax base that is dramatically different from counties with a very high percentage of properties being eligible for ad valorem taxation (second homes, snowbird property, new development, commercial).

To fully understand each county's property tax base, its impact on the tax rate, and county spending, please consult with local county leaders. Each county snapshot attached to this report, contains easily accessible and helpful links to individual county budgets and audit reports.

KEY TAKEAWAYS

Florida's property tax system is both the backbone of local government finance and a source of growing complexity. Property taxes remain the primary source of general revenue in nearly half of the state's counties, funding essential services like law enforcement, corrections, EMS, constitutional officers, disaster prep and response, and operations. Yet, even as property values have risen in recent years, the ratio of taxable value to just value has declined, leaving counties with shrinking tax bases relative to community demand.

Constitutional protections such as Save Our Homes and expanded homestead exemptions, while vital for taxpayers, have shifted the property tax burden onto non-homestead properties, including businesses and rental housing. This "balloon squeeze" effect means that counties must increasingly balance the competing interests of protecting homeowners, sustaining vibrant local economies, and maintaining fairness in the tax system.

At the same time, millage rate trends show counties acting with restraint, with most lowering or holding their rates steady over the past two decades. But in fiscally constrained counties—where one mill generates little revenue—higher millage remains necessary to fund even the most basic local services.

Expenditures tell the other half of the story. Public safety and general government together account for about half of all county budgets, reflecting both community expectations and statutory mandates. Rising personnel costs, particularly through state legislative changes to the Florida Retirement System, add further fiscal pressure. As a result, counties face the enduring challenge of meeting growing service demands in a high-growth state while navigating revenue limitations that often run counter to market trends. Policymakers and the public alike must recognize these pressures in order to sustain the essential services that keep Florida's communities safe, vibrant, and thriving.

WHAT IS A COUNTY AND WHY DOES THE ANSWER MATTER?

Florida's 67 counties are in a unique position among local governments as counties are responsible for less discretionary and more state mandated services and facilities than the remainder of the state's local governmental units (primarily municipalities). Counties are created by the state, originally for the purpose of delivering only state mandated services and facilities, often on behalf of the state but funded with local revenues. Municipalities, on the other hand, are created in the first instance by citizens, often to provide services and facilities those citizens are willing to pay for and that meet a desired (but not required) level of service (e.g., extra police patrol than the sheriff provides). And then, due to the decades-long population increases into the state, counties face many of the same resident demands for discretionary services and facilities as municipalities, like parks, recreation, libraries, workforce development programs, affordable housing, fire protection, and veterans' services, among many others, as almost 50% of the state's population resides in unincorporated areas. Meeting these demands is a governing responsibility on top of the constitutional, statutory, and regulatory mandates from the State of Florida.

The following list identifies many of the state mandated services and facilities required to be provided by **counties**. The list does NOT include fiscal impacts to counties when the state requires a county function be accomplished in a state-prescribed manner and the list does NOT include federal mandates.

Category	State Mandates / County Responsibilities
Public Safety	 Funding sheriffs and their entire departments, operating and capital costs Funding and executing disaster planning, response, and recovery Funding county detention facilities (jails) Overseeing countywide emergency medical service delivery Constructing, operating, and funding a county judicial courthouse Funding the pre-disposition costs of juvenile detention in state facilities Funding other defined aspects of the state court system (parking, technology, security, specialty courts)
Public Health Services	 Funding responsibilities for countywide public health programs Reimbursing participating hospitals that provide indigent care Funding state-defined Medicaid payments to the state Funding the disposition of unclaimed bodies Funding the costs of the medical examiner
Infrastructure	 Providing for the disposal of all the solid waste generated in a county Funding the construction and maintenance of county roads, bridges, tunnels, sidewalks, and other transportation facilities Constructing and funding facilities for the sheriff, the property appraiser, the tax collector, the clerk of court, and the supervisor of elections
Environmental Management	 Funding responsibilities for beach renourishment and stormwater management Funding, serving, and regulating comp. planning, growth management, zoning
Elections Administration	• Funding the independently elected supervisor of elections, his/her personnel, operations and administration of elections
Personnel Costs	 Funding the legislatively-established employer costs of the Florida Retirement System for almost all county employees, including special risk classes (sheriffs, firefighters) Funding the personnel of the constitutional officers, including sheriffs and all their stateestablished bonuses and salary increases

PROPERTY TAX ANALYSIS

In order to understand a county's property tax structure and its impact on revenues and the budget, the following formula is key:

TAX BASE x TAX RATE = PROPERTY TAX REVENUE EXPENDITURES

TAX BASE

The first step in understanding a county's property tax experience is to examine the county's **Tax Base**. The **Tax Base** is composed of:

- the property values
- the property mix (portion of residential and non residential)
- assessment limitations (bona fide agricultural, Save Our Homes)
- exemptions (homestead) impacting the taxable value of a county

This report and the attached, individual county snapshots pull data from the DOR's Property Tax Oversight (PTO) Program and Florida Property Tax Data Portal.

PROPERTY VALUES

Before constitutional and statutory adjustments are made to properties for the purposes of property taxation, the first step in identifying the **Tax Base** is for the county property appraiser to assign the **Just Value** (market value of property) of all properties in the county. The **Just Value** is then adjusted based on all applicable assessment factors and exemptions and the result is **Taxable Value**. Thus, **Taxable Value** is the value of property that is lawfully subject to county ad valorem property taxes. **Taxable Value** will always be less than **Just Value**.

The growth in **Assessment Limitations**, such as Save our Homes and Portability, has ballooned since the passage of the 2008 constitutional amendments. These limitations artificially keep property taxes below market growth. For example, Save Our Homes limits growth to 3% or less annually which is well below the growth in **Assessed Value**, thus keeping **Taxable Value** low for those property owners.

The following chart depicts the relationship between **Just Value** and **Taxable Value**.

RATIO: TAXABLE VALUE VS. JUST VALUE

Tables 1, 2, and 3 similarly depict a county-by-county comparison of Taxable Value, Just Value, and the **Ratio** of Taxable Value to Just Value, using 2020 (pre-COVID) and 2024 (most recent) data. The **Ratio** is the amount of property that is subject to county ad valorem property taxation.

On a statewide basis, that **Ratio** is dropping. The decline means that *access* to the **Tax Base** is *decreasing* while life/safety, law enforcement, corrections, mandates, and quality of life county services are *increasing* as they are provided to meet the *demands* of the market (**Just Value**).

Often, as the **Ratio** of Taxable Value to Just Value decreases, counties have the opposite pressure to raise millage rates, or at least maintain the existing rate, to provide the same level of service to more people and properties but with a declining Tax Base.

WHILE PROPERTY VALUES HAVE RISEN STATEWIDE, THE RATIO OF TAXABLE VALUE TO JUST VALUE HAS DECLINED IN ALL BUT A HANDFUL OF COUNTIES, MEANING LOCAL TAX BASES ARE BECOMING MORE COMPLEX

PROPERTY MIX

A county's **Taxable Value** must be analyzed through an examination of the county's **Property Mix**. How much property is homestead and how much is non-homestead? While most of the constitutional and statutory assessment adjustments and tax exemptions provide targeted tax relief to certain properties, those benefits shift the overall tax responsibility to other parts of a county's property mix. As **Just Value** has risen, the shifts in tax liability have become more significant, particularly for non-homestead properties such as commercial businesses and residential rental properties. Understanding a county's ratio of homestead to non-homestead properties reveals which properties bear a disproportionate share of the property tax burden.

HOMESTEAD VS. NON-HOMESTEAD

In terms of generated revenue (Florida Department of Revenue)

THE STATEWIDE RATIO OF HOMESTEAD PROPERTY TO NON-HOMESTEAD PROPERTY IS APPROXIMATELY 35.1% (H) TO 64.9% (NH).

<u>Table 4</u> provides county-by-county data on the share of the property tax burden from real property. The chart differentiates between homestead property—residential real property containing a homestead exemption, and non-homestead property—all other real property including non-homesteaded residential, commercial, industrial, institutional, vacant, and agricultural properties.

ANY PROPOSED INCREASE TO HOMESTEAD PROPERTY TAX EXEMPTIONS "SQUEEZES THE WATER BALLOON" OR SHIFTS THE TAX BURDEN FROM HOMESTEAD PROPERTY OWNERS TO OTHER PROPERTY TAXPAYERS.

TAX RATE

County commissioners are often evaluated by voters at the ballot box based on their property tax millage rate decisions. The Florida Constitution caps the millage rate that can be levied by boards of county commissioners to 10 mills for county purposes and 10 mills for municipal purposes. The value of 1 mill varies county by county, depending on the **Taxable Value** of a particular county. The lower the **Taxable Value** in a county, the less tax revenue 1 mill will generate and, often, the higher the millage rate. (When Taxable Value x Tax Rate = Revenue, and Taxable Value is low, the Tax Rate must increase in order to generate enough revenue to meet the community's most basic needs.) The "fiscally constrained counties" are statutorily identified by the low value of 1 mill in those counties.

55 OF 67 COUNTIES HAVE LOWERED OR MAINTAINED
THE OPERATING MILLAGE RATE SINCE 2020

Counties are also constitutionally authorized to levy other millage rates for specific purposes. These include:

- 1. County debt service millage
- 2. County voted millage authorized by a vote of the electors
- 3. County dependent special district millage
- 4. Municipal Services Taxing Unit for specific municipal services in a specific location

<u>Table 5</u> depicts several comparative data points on county-by-county millage rates. Table 5 shows the **Countywide Operating Millage**, which is levied on all property in the county, over the last five years as well as the most recent year's **Roll Back Rate**. The **Roll Back Rate** is the millage rate that would generate the same amount of property tax revenue as the prior year, with some statutory exclusions (including new construction).

Counties may also levy other specific purpose millages, including **MSTU** (Municipal Services Taxing Unit) millage. MSTU millage is levied for earmarked purposes, such as emergency medical response services; stormwater improvements and maintenance; fire protection services, road, sidewalk and street lighting maintenance in discrete geographic areas. The revenue from an **MSTU** can only be spent in the area it was collected from and only for the purpose it was levied. **Countywide Operating Millage**, thus, is used for general, countywide services, like funding the operations and services of the property appraiser, the tax collector, the clerk of the court, the supervisor of elections, the Sheriff, libraries, parks, and other state mandated functions (e.g., formula driven, county Medicaid payments; Department of Juvenile Justice predisposition detention costs, FRS contributions for county employees).

FOR MORE INFORMATION ON ALL MILLAGE RATES LEVIED BY FLORIDA COUNTIES, PLEASE VISIT THE FLORIDA DEPARTMENT OF REVENUE <u>PROPERTY TAX DATA PORTAL</u>

REVENUE - WHERE DOES THE MONEY COME FROM?

This report and each attached county's snapshot compare Ad Valorem Tax Revenue and other sources of County Revenues to show the makeup of revenues for a county. The table below compares 2021 and 2024 county revenues on a statewide basis.

TOTAL COUNTY REVENUES: 2021 VS. 2024

The chart shows county revenues statewide by funding source including ad valorem property taxes.

TOTAL COUNTY REVENUES							
	FY 2021	FY 2024	% Change				
Total Revenues	55.76 B	70.55 B	26.5%				

AD VALOREM REVENUES: 2021 VS. 2024

The chart shows county ad valorem revenues statewide.

AD VALOREM REVENUES							
	FY 2021	FY 2024	% Change				
Ad Valorem	14.08 B	18.82 B	33.7%				

2024 REVENUES

<u>Table 6</u> shows county revenues for Fiscal Year 2024 by revenue category. In nearly half of Florida's counties (32 counties), ad valorem property tax revenues make up the largest share of county revenues. Because of this fact, a county is more dependent on property tax revenue to fund core services like law enforcement, corrections (county jail), constitutional officers, emergency management, fire protection, libraries, parks, and operations. In some counties, Intergovernmental Revenues (20 counties) and Charges for Services (15 counties) are the leading revenue category due to reliance on state-shared revenues (often the fiscally constrained

counties) or significant enterprise functions as revenue drivers such as the operation of an airport, seaport, or utility. Charges for Services are usually restricted to pay expenses related to the specific service provided *first* and are not as fungible as ad valorem revenues. Disruptions to the balance among a county's revenue sources will have significant budgetary impacts.

ALTHOUGH PROPERTY TAXES (26.7% OF ALL STATEWIDE COUNTY REVENUE) ARE THE PRIMARY SOURCE OF REVENUE IN MOST COUNTIES, "CHARGES FOR SERVICES" LEADS THE WAY BY GENERATING ALMOST 30.4% OF ALL COUNTY REVENUE STATEWIDE.

EXPENDITURES—WHERE DOES THE MONEY GO?

This report and each attached county's snapshot compare county expenditures to examine the breakdown of spending priorities for a county. The table below compares 2021 and 2024 county expenditures on a statewide basis.

TOTAL COUNTY EXPENDITURES: 2021 VS. 2024

TOTAL COUNTY EXPENDITURES							
		FY 2021	FY 2024	% Change			
Total Expenditures		50.32 B	60.17 B	19.6%			

County expenditures are concentrated in core services like law enforcement, corrections (jail), constitutional officers, emergency management, fire protection, other mandates, and operations, reflecting the largest share of local spending priorities. This fact is both true on total county expenditures on a statewide basis and at the county level.

<u>Table 7</u> provides county-by-county data for the nine expenditure categories in FY 2024. The largest expenditure category for FY 2024 is Public Safety, leading in 55 counties while General Government leads in five counties and accounts for the second largest expenditure category

statewide. General Government expenditures are services provided by the legislative and administrative branches of the local government for the benefit of the public and the governmental body as a whole including the tax collector, property appraiser, comprehensive planning, risk management, insurance, purchasing, HR, IT, and fiscal services. Together, these two expenditure categories account for roughly half of all county expenditures on a statewide basis. In most counties, Law Enforcement and Detention/Corrections account for over two-thirds of all Public Safety spending.

PUBLIC SAFETY EXPENDITURES NOT ONLY INCLUDE LAW ENFORCEMENT AND CORRECTIONS PROVIDED BY THE SHERIFF, BUT ALSO INCLUDE FIRE CONTROL, AMBULANCE AND RESCUE SERVICES, PROTECTIVE INSPECTIONS (BUILDING AND OTHER PERMITS), CONSUMER AFFAIRS SERVICES, AND EMERGENCY MANAGEMENT AND DISASTER RELIEF RELATED SERVICES.

2024 EXPENDITURES BY TYPE (OBJECT CODE)

Spending by object code highlights the cost drivers within county budgets, with personnel, operating expenses, and capital outlay shaping overall expenditure patterns. As service providers, it is no surprise that Operating and Personnel expenditures are the top two categories for nearly all counties. Table 8 provides county-by-county data for object code expenditures statewide. While Personnel expenditures are the largest type in 39 counties, total Operating expenditures are greater statewide but only lead in 26 counties. This fact is attributable to the enterprise functions and associated costs in several larger counties skewing the statewide expenditure totals.

NEARLY ALL COUNTY PERSONNEL (WHICH INCLUDES SHERIFF PERSONNEL) ARE MEMBERS OF THE FLORIDA RETIREMENT SYSTEM. THE ANNUAL COSTS FOR EMPLOYERS IN FRS, WHICH INCLUDES COUNTIES, ARE MANDATED BY THE FLORIDA LEGISLATURE.

KEY TAKEAWAYS

Florida's property tax system is both the backbone of local government finance and a source of growing complexity. Property taxes remain the primary source of general revenue in nearly half of the state's counties, funding essential services like law enforcement, corrections, EMS, constitutional officers, disaster prep and response, and operations. Yet, even as property values have risen in recent years, the ratio of taxable value to just value has declined, leaving counties with shrinking tax bases relative to community demand.

Constitutional protections such as Save Our Homes and expanded homestead exemptions, while vital for taxpayers, have shifted the property tax burden onto non-homestead properties, including businesses and rental housing. This "balloon squeeze" effect means that counties must increasingly balance the competing interests of protecting homeowners, sustaining vibrant local economies, and maintaining fairness in the tax system.

At the same time, millage rate trends show counties acting with restraint, with most lowering or holding their rates steady over the past two decades. But in fiscally constrained counties—where one mill generates little revenue—higher millage remains necessary to fund even the most basic local services.

Expenditures tell the other half of the story. Public safety and general government together account for about half of all county budgets, reflecting both community expectations and statutory mandates. Rising personnel costs, particularly through state legislative changes to the Florida Retirement System, add further fiscal pressure. As a result, counties face the enduring challenge of meeting growing service demands in a high-growth state while navigating revenue limitations that often run counter to market trends. Policymakers and the public alike must recognize these pressures in order to sustain the essential services that keep Florida's communities safe, vibrant, and thriving.

FOR FURTHER INVESTIGATION: NEXT STEPS

The data in this Report and the County Snapshots are but a portion of local property taxes and county budgets. To fully understand how and why each county made the decisions that were made, individual investments and comprehensive financial data consult with local elected leaders. In addition, <u>2024 county budgets</u> and <u>comprehensive audit reports</u> are available on individual county websites.

NOTES AND DATA SOURCES

Property Tax Data: Florida Department of Revenue, Florida Property Tax Data Portal, Florida Ad Valorem Valuation and Tax Data: reported 2024 data as of December 12, 2024, downloaded from https://floridarevenue.com/property/Pages/DataPortal DataBook.aspx

Revenue and Expenditures: FY 2024 data is compiled based upon verified revenues and expenditures of all counties, which have been reported to the Florida Division of Financial Services as of August 11, 2025. Revenue and Expenditure data for the following 18 counties uses FY 2023 data: Baker, Bay, Bradford, Columbia, Dixie, Flagler, Franklin, Gilchrist, Gulf, Hernando, Jefferson, Lafayette, Liberty, Okaloosa, Okeechobee, St. Lucie, Suwannee, and Taylor. All revenue and expenditure data reports sourced from Department of Financial Services, Division of Accounting and Auditing, Bureau of Local Government (LOGER).

Custodial Funds: the Department of Financial Services added the Custodial Fund column to the Annual Financial Report in FY 2020-21. Custodial Fund reporting is used to account for assets held by a government in a purely custodial capacity. For purposes of making accurate comparisons to county budgets, custodial funds are removed.

Interfund Transfers: this report removes interfund transfers as well as interfund transfers out from Other Sources within both revenue and expenditure categories.

City of Jacksonville/Duval County: for purposes of county reporting, the City of Jacksonville revenue and expenditure data is used to represent the Duval County.

GLOSSARY OF TERMS

Ad Valorem Taxes: from Latin, meaning "according to value", refers to a tax based upon the value of property and is used interchangeably with property taxes.

Assessed Value: value of a property that the county property appraiser assigns for tax purposes after applying assessment limitations (such as Save Our Homes).

Assessment Limitations: constitutional or statutory cap on how much the assessed value of a property can increase each year, regardless of changes in its just value. This prevents property taxes from rising too quickly for property owners, even in times of rapid appreciation. The most well-known example is the **"Save Our Homes" Amendment**, adopted in 1992.

Charges for Services: revenue generated when the government provides specific services directly to individuals, organizations, or businesses and charges a fee for those services.

Countywide Operating Millage: levied on all property in the county

Fiscally Constrained Counties: noted using an asterisk* in the tables that follow on pages 14-21, indicates that the county matches the description of a fiscally constrained county in s. 218.67 (1), F.S. This definition is tied to the value of a mill. There are **29 fiscally constrained counties** in Florida.

Intergovernmental Revenue: all revenues from federal, state and other local government sources. These funds came in the form of grants, shared revenues, and payments in lieu of taxes.

Just Value: refers to the value of the property without regard to a possible agricultural classification or Save Our Homes (SOH) deferred amount. Just Value is market value and is the reflection of the value of land if it were not classified as agricultural and had no SOH deferred amount.

Municipal Services Taxing Unit (MSTU) millage: levied for earmarked purposes, such as emergency medical response services; stormwater improvements and maintenance; fire protection services, road, sidewalk and street lighting maintenance, and usually in a discrete geographic area.

Object Code: classify the *type* of expenditure being made, rather than the purpose of the expenditure; the nature of the good or service; identifies whether it's personnel, operating expenses, capital outlay, grants, or debt service.

Ratio of Taxable Value to Just Value is the amount of property that is subject to county ad valorem property taxation.

Roll Back Rate (RBR): the millage rate that would generate the same amount of property tax revenue as the prior year, with some statutory exclusions (including new construction).

Taxable Value: refers to the value of the property that is subject to taxes. Taxable Value is the assessed value minus all exemption amounts.

Florida County Property Tax Report

Understanding Counties and Ad Valorem Taxes

August 2025

ALACHUA COUNTY

This data provides a snapshot of the county's property taxes. However, the data does not depict the complete and complex story of a county's property tax revenues and expenditures. To fully understand how and why each county made their decisions, state leaders should consult with county officials to obtain the appropriate context underlying the data below. Other helpful information can be found at the following links:

County Budgets

County Audits

ALACHUA COUNTY TAX BASE

Just Value, Taxable Value, & Ratio of Taxable Value to Just Value In Billions

While values have risen statewide, the ratio between taxable value and just value has declined in all but a handful of counties, meaning that local tax bases are becoming more complex.

2024 HOMESTEAD vs. NON-HOMESTEAD

In terms of generated revenue (Florida Department of Revenue)

The statewide ratio of homestead property to non-homestead property is 35.1%(H) to 64.9% (NH)

ALACHUA COUNTY

ALACHUA COUNTY MILLAGE RATES

OPERATING MILLAGE RATE: FY 2021 VS. FY 2025

OPERATING MILLAGE RATE					
Taxing Authority	FY 2020-21	FY 2024-25	2025 RBR		
Alachua County BCC	7.8935	7.6180	7.1286		

In addition to the constitutional millage depicted above, counties are also authorized to levy other millage rates for specific purposes. These include:

- 1. County debt service millage
- 2. County voted millage authorized by a vote of the electors
- 3. County dependent special district millage
- 4. Municipal Services Taxing Unit for services provided within the county or a sub-region of the county

For more information on millage rates levied by Florida Counties, please visit the Department of Revenue

Property Tax Data Portal

ALACHUA COUNTY REVENUES

TOTAL COUNTY REVENUES: FY 2021 VS. FY 2024 In Millions

TOTAL COUNTY REVENUES					
	FY 2021	FY 2024	% Change		
Total Revenues	\$451.56 M	\$499.61 M	10.6%		

AD VALOREM REVENUES: FY 2021 VS. FY 2024 In Millions

AD VALOREM REVENUES					
	FY 2021	FY 2024	% Change		
Ad Valorem	\$146.19 M	\$186.67 M	27.7%		

WHERE DOES THE MONEY COME FROM? In Millions

Although property taxes (26.7% of all statewide county revenue) are the primary source of revenue in nearly half of the counties, "charges for services" leads the way by generating almost 30.4% of all county revenue statewide.

ALACHUA COUNTY

ALACHUA COUNTY EXPENDITURES

TOTAL COUNTY EXPENDITURES: 2021 VS. 2024 In Millions

TOTAL COUNTY EXPENDITURES					
	FY 2021	FY 2024	% Change		
Total Expenditures	\$406.41 M	\$467.19 M	15.0%		

2024: WHERE DOES THE MONEY GO? In Millions

Public safety expenditures not only include law enforcement and corrections provided by the Sheriff (in most cases), but also include Fire Control, Ambulance and Rescue Services, Protective Inspections (building and other permits), Consumer Affairs Services, and Emergency Management / Disaster Relief related services.

2024: WHERE DOES THE MONEY GO? EXP. TYPE

With a few exceptions, nearly all county personnel are members of the Florida Retirement system. The annual costs for employers (counties included) are mandated by the Florida Legislature

BAKER COUNTY

This data provides a snapshot of the county's property taxes. However, the data does not depict the complete and complex story of a county's property tax revenues and expenditures. To fully understand how and why each county made their decisions, state leaders should consult with county officials to obtain the appropriate context underlying the data below.
